FOR IMMEDIATE RELEASE

## Zoubek Consulting Expands EOHS Services

*Services expansion by occupational health and safety consulting firm will broaden capabilities to present and future client base.*

San Diego, Calif. – February 1, 2016 – San Diego-based Zoubek Consulting, LLC, Workplace Safety Solutions, announced that in 2016, it will expand services capabilities by offering additional environmental, occupational, health and safety (EOHS) assistance options and a new deadline tracking system.

Zoubek Consulting offers customized and company-specific services and expert advice in the areas of management and engineering control of workplace hazards, written safety program development, regulatory compliance support, and training. The company provides comprehensive safety program management assistance to a wide array of businesses nationwide.

Through dynamic investment in its highly qualified, professional team staff, Zoubek Consulting now offers commercial property assistance, as well as a full suite of chemical inventory and hazard communication services that meet Globally Harmonized System requirements. The firm has also expanded its safety services and industrial hygiene division.

Through investment in technology, Zoubek Consulting can now readily track compliance activity due dates, such as those related to safety training, agency inspections, and environmental health/safety related quality deadlines. The advanced system, called ZoubekTrak, automatically monitors regulatory deadlines so that Zoubek Consulting can assist its clients in staying ahead of these critical timeframes.

“We’ve been successful nationally in providing comprehensive services to both small and large organizations,” said owner Paul Zoubek. “Our proactive safety services produce measurable, sustainable improvements in health and safety programs; with these additional services we will continue to accommodate our clients’ most diverse and challenging EOHS needs.”

Zoubek Consulting’s client base is diverse, encompassing Research and Development, Aerospace, Colleges and Universities, Chemical, Manufacturing, Recycling & Waste Processing, Electronics, Utilities, Municipalities, and Biotechnology. The recent expansion is expected to significantly increase the scope of service options as well as the type of clients served.

Zoubek Consulting, LLC, is located in central San Diego, [www.zoubekconsulting.com](http://www.zoubekconsulting.com) and can be reached by phone at (619) 431-5705 and through email at [info@zoubekconsulting.com](mailto:info@zoubekconsulting.com).
